Education

National Yang Ming Chiao Tung University

M.S. Computer Science

Hsinchu, Taiwan

Sep. 2025 – Now

- Overall GPA: 4.23/4.3
- Conducting research in Wireless Internet Lab.

National Yang Ming Chiao Tung University

B.S. Computer Science

Hsinchu, Taiwan

Sep. 2021 – Jun. 2025

- Overall GPA: 4.2/4.3, Rank: 17/168
- Conducted research in Human-centered Intelligent Systems Lab.
- Relevant Courses: Algorithm, Operating System, System Administration, Network Administration, Cloud Native, Deep Learning, Reinforcement Learning, Microprocessor.

Publications

Rate-Assured GPU Inference for 5G AI Slices

Yu-Hong Shen, Wen-Ju Chiang, Hsiang-Ming Hung, Yen-Ting Kuo, Chien-Chao Tseng, Meng-Hsun Tsai

- ACM SIGCOMM (poster). [Link](#).
- Extended 5G network slicing with GPU-side scheduling to enforce end-to-end latency guarantees for edge AI.

AgentOps: A Kubernetes-based DevOps Framework for Managing Agentic AI Lifecycle

Yu-Hong Shen, Wen-Ju Chiang, Yong-Xiang Zhan, Chien-Chao Tseng

- IEEE ICASI.
- Designed a Kubernetes-based framework decoupling agent artifacts for independent CI/CD and observability.

Hybrid L7/eBPF Proxy: User Space Classification with Kernel-Space Socket Splicing

Wen-Ju Chiang, Hsiang-Ming Hung, Yu-Hong Shen, Yen-Ting Kuo, Chien-Chao Tseng, Meng-Hsun Tsai

- USENIX NSDI (poster).
- Designed a hybrid L7/eBPF proxy that achieves near kernel-level performance with full L7 visibility.

Mitigating Cross-Modal Distraction and Ensuring Geometric Feasibility via Affordance-Guided and Self-Consistent MLLMs for Task Planning in Instruction-Following Manipulation

Yu-Hong Shen, Chuan-Yu Wu, Yi-Ru Yang, Yen-Ling Tai, Yi-Ting Chen

- CoRL 2025 Workshop iCare. [Project Page](#).
- Developed an affordance-guided, self-consistent MLLM planner to reduce distraction and enforce feasibility.

Internship

AMD | Foundry Product Operation Intern

Jun. 2026 – Aug. 2026

Hsinchu, Taiwan

- Built parser and visualizer for SMT8 specs, flagging misconfigurations against profiling data and diffing across versions.
- Trained DL model detecting wafer map patterns; cut LLM labeling tokens 80% via semi-supervised learning.

TSMC | IT BSID DevOps Engineer Intern

Jul. 2025 – Aug. 2025

Hsinchu, Taiwan

- Designed and implemented both frontend and backend services using Java and Next.js.
- Deployed containerized services to a Kubernetes cluster using Azure DevOps pipelines.

ASML Holding N.V. | D&E Software Engineer Intern

Jan. 2025 – Jun. 2025

Taipei, Taiwan

- Conducted a comprehensive survey on Java 8 to 11 migration using OpenRewrite.
- Leveraged existing tools and implemented an automated performance analysis pipeline.

CloudMile Inc. | Technical Account Manager Intern

Jul. 2024 – Dec. 2024

Taipei, Taiwan

- Participated in PoCs to validate cloud solutions for clients, enhancing technical problem-solving skills.
- Designed and implemented innovative ideas for clients, successfully deploying them to production.

Certificates

TOEIC: Total: 965 / Reading: 485 / Listening: 480

GEPT: High-Intermediate — Total: 225 / Reading: 117 / Listening: 108

GCP Professional Cloud Architect — Certified during Internship at CloudMile.
