Education

National Yang Ming Chiao Tung University

M.S. Computer Science

Hsinchu, Taiwan

Sep. 2025 - Now

- Overall GPA: 4.3/4.3
- Conducting research in Wireless Internet Lab.

National Yang Ming Chiao Tung University

B.S. Computer Science

Hsinchu, Taiwan

Sep. 2021 - Jun. 2025

- Overall GPA: 4.2/4.3, Rank: 17/168
- Conducted research in Human-centered Intelligent Systems Lab.
- Relevant Courses: Algorithm, Operating System, System Administration, Network Administration, Cloud Native, Deep Learning, Reinforcement learning, Microprocessor.

Publications

Mitigating Cross-Modal Distraction and Ensuring Geometric Feasibility via Affordance-Guided and Self-Consistent MLLMs for Task Planning in Instruction-Following Manipulation

Yu-Hong Shen, Chuan-Yu Wu, Yi-Ru Yang, Yen-Ling Tai, Yi-Ting Chen

- CoRL 2025 Workshop iCare (Oral). [Project Page](#).
- Developed an affordance-guided, self-consistent MLLM planner to reduce distraction and enforce feasibility.

Hybrid L7/eBPF Proxy: User Space Classification with Kernel-Space Socket Splicing

Wen-Ju Chiang, Hsiang-Ming Hung, Yu-Hong Shen, Yen-Ting Kuo, Chien-Chao Tseng, Meng-Hsun Tsai

- USENIX Symposium on Networked Systems Design and Implementation, NSDI (poster).
- Designed a hybrid L7/eBPF proxy that achieves near kernel-level performance with full L7 visibility.

Internship

TSMC

IT BSID DevOps Engineer Intern

Hsinchu, Taiwan

July. 2025 - Aug. 2025

- Designed and implemented both frontend and backend services using Java and Next.js.
- Deployed containerized services to a Kubernetes cluster using Azure DevOps pipelines.

ASML Holding N.V.

D&E Software Engineer Intern

Taipei, Taiwan

Jan. 2025 - Jun. 2025

- Conducted a comprehensive survey on Java 8 to 11 migration using OpenRewrite.
- Leveraged existing tools and implemented an automated performance analysis pipeline.

CloudMile Inc.

Technical Account Manager Intern

Taipei, Taiwan

July. 2024 - Dec. 2024

- Participated in PoCs to validate cloud solutions for clients, enhancing technical problem-solving skills.
- Designed and implemented innovative ideas for clients, successfully deploying them to production.

Projects

Multi-Objective Denoising Diffusion Policy Optimization [GitHub]

2024

Deep Learning Course Project

Python, Pytorch

- Integrated DDPO and PGMORL in a two-stage process to approximate optimal trade-offs.
- Evaluated with various objectives, including compressibility, prompt-image alignment, and aesthetic quality.

Open Source Contribution

2026

- apache/airflow
- argoproj/argo-workflow
- facebook/pyrefly

Certificates

TOEIC Total: 965 / Reading: 485 / Listening: 480

GCP Profession Cloud Architect Certified during Internship at CloudMile.
